

Ideal Customer Profile & Buyer Personas

Feature list · Use cases · Qualification playbook

Document date: 2026-10-08

Product: Multitenant AI agent for Instagram Direct

CRM: KeyCRM · BeautyPro · CleverBOX · Altegio | CRM integration from 24h

Full go-live typically ~48h (Meta + prompts + CRM)

Audience: Founders, Sales, Partnerships, Customer Success

Classification: Internal — do not distribute externally without review

One-line ICP:

Ukrainian (and similar) Instagram-native brands and appointment businesses that already receive sales or booking DMs, can connect Meta + a CRM (including Altegio) or Telegram ops sink, and will pay for a dedicated AI agent instance to convert Direct traffic 24/7 with human escalation.

2. Market definition
3. Ideal Customer Profile (ICP)
4. Buyer Personas (BP)
5. Buying committee & triggers
6. Feature list (incl. Altegio & CRM SLA)
7. Use cases (examples)
8. Value props, qualification & anti-ICP
9. Demo agenda (30 min)

1. How to use this document

Follow this sequence on every opportunity. Stop early on hard disqualifiers.

Step	Action	Output
1	Score account against ICP Must-haves	Fit: Strong / Partial / No
2	Identify primary Buyer Persona + economic buyer	Talk track + objections
3	Confirm buying triggers	Timing: Now / Warm / Later
4	Map decision unit (signer / blocker)	Stakeholder plan
5	Pick agent mode + CRM (KeyCRM / BeautyPro / CleverBOX / Altego)	Demo / pilot scope
6	Walk matching Use Case	Proof in Sandbox or Debug
7	Choose offer path (trial / paid deploy)	Next-meeting agenda
8	Disqualify if Anti-ICP matches	Do not spend cycle

2. Market definition

Dimension	Scope
Category	Conversational commerce / Instagram DM automation for SMBs & mid-market brands
Primary channel	Instagram Business + Facebook Page (Messenger Platform)
Core jobs	Reply 24/7; qualify; sell or book; hand off to humans; sync CRM
Launch SLAs	CRM integration from 24 hours (credentials + routing ready). Full go-live typically ~48 hours (Meta + prompts + CRM).
CRM stack	KeyCRM · BeautyPro (Beauty/Fitness/Denta) · CleverBOX · Altego
Geo (current GTM)	Ukraine-first (UA language, Nova Poshta, local CRM); EU-hosted
Not competing with	Generic website chatbots; WhatsApp-only suites; CRM without IG DM agent

3. Ideal Customer Profile (ICP)

3.1 Firmographics

Attribute	Ideal	Acceptable	Out of scope
Business model	D2C / brand selling via IG; multi-location beauty/fitness/dental with booking	Hybrid IG + site	Pure B2B, no IG consumer demand
Industry	Fashion/apparel/beauty retail; salons, barbers, fitness, dental	Home goods, niche e-com	Heavy regulated advice without human gate
Size	1–3 owners + 1–10 ops; or 1–15 locations	Growing teams, IG as sales channel	Enterprise custom SLA-only deals
IG maturity	Business IG + FB Page; regular inbound DMs	Seasonal peaks, real volume	Personal IG only; no Advanced Access path
Revenue signal	Missed DMs = lost revenue; overtime on chat	Planning first chat hire	Curious about AI, no volume
Tech readiness	Meta OAuth + CRM (KeyCRM / BeautyPro / CleverBOX / Altegio) or Telegram	Telegram-only at start	Refuse Meta permissions

3.2 Technographics

Must	Preferred	Optional
IG Business + FB Page in Business Manager	KeyCRM or BeautyPro/Fitness/Denta or CleverBOX or Altegio	Nova Poshta (UA shipping)
Admin who can complete Meta Live / Advanced Access	Ops owner for prompts & catalog	Multiple IG assets later
Accepts dedicated tenant (isolated instance)	Structured catalog / service list	Voice STT, smart follow-ups

3.3 Company behaviors

- Treats Instagram DM as a revenue channel, not a FAQ widget.
- Feels latency pain: clients expect minutes; staff answers hours later.
- Wants brand-owned automation (own prompts/knowledge), not a shared generic bot.
- Accepts AI with human escalation (Telegram handoff).
- Can dedicate 1–2 hours for onboarding (OAuth, catalog/CRM, prompt review).

3.4 ICP scorecard

Score +2 / +1 / 0 / –2 per row. **Strong fit** ≥ 10. **No-go** ≤ 3 or any hard disqualifier.

Criterion	+2	+1	0	–2
Daily inbound DMs	High, intent	Moderate	Low	Almost none
IG + Page ready	Live messaging	Fixable in 1 week	Unclear BM	Personal only
Economic buyer	Owner on call	Ops with budget path	Marketer only	No decision path
CRM / ops sink	CRM or Telegram	Telegram only	Spreadsheet	Won't adopt
Catalog / services	Structured	Semi-structured	Ad-hoc	Invent later
Compliance appetite	OK Meta + EU host	Needs guidance	Resistant	Blocks permissions

Hard disqualifiers: no Instagram Business path; WhatsApp-only expectation; free forever without trial discipline; medical/legal advice without handoff; refuses isolated tenant.

4. Buyer Personas (BP)

BP-1 — Economic Buyer: Owner / Founder

Field	Detail
Role	Founder, co-owner, salon/network owner
Goal	More closed orders/bookings without proportional headcount
Pain	Night/weekend DMs lost; overloaded managers; inconsistent answers
Success metric	% dialogs without manager; response time; IG orders/bookings
Budget	Yes (monthly + setup)
Objections	Brand risk; Meta permissions; price vs junior hire
Message	Isolated instance; CRM from 24h; prompt control; handoff
Ask	Pilot month → metrics review → convert
Demo focus	End-to-end order or booking + Telegram card

BP-2 — Champion: Sales / Salon Admin / Community Manager

Field	Detail
Role	Runs IG chats daily or manages the team
Goal	Fewer repetitive chats; clean handoff; CRM without retyping
Pain	Copy-paste; missed sizes/addresses; double-booking; night shifts
Success metric	Time saved; fewer errors; fewer routine escalations
Budget	Influences; rarely signs alone
Objections	Another tool to babysit; prompt quality; CRM edge cases
Message	Admin, Teach/Sandbox, CRM tools (incl. Altegio), Telegram cards
Ask	Co-own prompt + catalog; weekly review first 2 weeks
Demo focus	Sandbox replay; unfinished funnel; handoff SLA

BP-3 — Technical Gate: IT / Digital / Agency

Field	Detail
Role	Internal IT, Meta specialist, performance agency
Goal	Stable webhooks/OAuth; no brand-safety incidents
Pain	Broken webhooks; App Review; multi-tenant domains
Success metric	Uptime; correct routing; Advanced Access approved
Budget	Blocks or unblocks; rarely pays
Objections	Scopes, Live mode, shared vs dedicated Meta app
Message	Documented Meta flow; CRM hookup from 24h; EU host
Ask	Working OAuth + webhook proof before go-live
Demo focus	Settings → Meta; health; Debug whitelist

BP-4 — Blocker: Senior Master / Star Seller

Top closer who fears replacement. **Handle:** position AI as first line; preserve their close on high-value; show handoff SLA.

5. Buying committee & triggers

Committee: Owner (signs) ← Champion (runs) ← Tech gate (Meta/CRM). Minimum to close: Owner + Champion on one call; Tech available for OAuth week.

Pursue when ≥ 1 : DM backlog; hiring chat manager; new salon/SKU; CRM re-entry pain; competitors faster in DM; explicit AI-for-IG request.

6. Feature list

6.1 Agent runtime (customer-facing)

Feature	What it does
Agent modes	sales / leadgen / booking / general (union)
Instagram DM automation	Webhooks → Claude → outbound DM; long-reply split; Markdown stripped
Typing + coalesce	typing_on while generating; rapid bubbles merged into one turn
Working hours / timezone	Tenant IANA TZ (default Europe/Kyiv); out-of-hours strategies
Reply delay	Optional human-like pause 0–60s
Smart-trigger follow-up	Silent client after bot (default 18h) → one contextual nudge in Meta window
Handoff	Keyword + AI escalation; Telegram card; SLA reminder
Manager IG echo	Native IG app replies labeled in admin; bot stops
Vision / media	Product photos, payment screenshots, Stories, shared posts/reels
Debug / Public runtime	Whitelist-only replies in Debug for safe go-live

6.2 Sales, leadgen, booking

Area	Capabilities
Sales	Catalog search; Nova Poshta delivery cost; collect_order / create_local_order; optional KeyCRM mirror; TTN lookup
Leadgen	Intent classify; submit_brief → Telegram (+ KeyCRM lead if write on)
Booking	Services/slots/book/cancel/reschedule via BeautyPro, CleverBOX, or Altego; client history; branches; unfinished funnel

6.3 CRM & integrations

Provider	Capabilities
KeyCRM	Catalog, orders, leads, client upsert, shipment/TTN
BeautyPro (Beauty/Fitness/Denta)	Locations, services, free_time, appointments, clients, history
CleverBOX	Services, branches, booking
Altego	Booking CRM for beauty / wellness — services, schedule, appointments (rolling out with existing adapters)
Hybrid routing	e.g. catalog/orders → KeyCRM; booking → BeautyPro / CleverBOX / Altego
CRM integration SLA	From 24 hours when credentials and routing are ready. Full tenant go-live (Meta + prompts + CRM) typically ~48 hours.
Telegram	Multi-bot notify: orders, briefs, bookings, handoff, late client
Nova Poshta	Delivery cost + TTN lookup
Meta OAuth	Page token + IG messaging; hub redirect for platform tenants

6.4 Tenant admin & platform ops

Surface	Capabilities
Tenant admin	Conversations, orders, prompts, Teach, Sandbox, Insights, Settings, Sync, dedicated isolation
Super Admin	Webhook hub, provision/deploy/destroy, midnight auto-update, access control, health

7. Use cases (examples)

UC-1 — Fashion brand: DM → order → KeyCRM + Telegram

ICP fit	Mode	Flow	Outcome	Demo tip
D2C apparel; KeyCRM	sales / general	Catalog → quote → collect_order → local Order + optional KeyCRM + Telegram	Order without manager typing	Shared reel → full collect

UC-2 — Where is my parcel?

ICP fit	Mode	Flow	Outcome	Demo tip
Post-purchase support	sales / general	Phone/TTN → lookup_order_shipment → status in DM	Fewer tracking handoffs	Brand-owned test TTN only

UC-3 — Salon: book with preferred master

ICP fit	Mode	Flow	Outcome	Demo tip
BeautyPro / Altego salon	booking / general	Phone → history → services → slots → book_appointment	Visit in CRM without admin UI	Grade prices; closed-day guard

UC-4 — Multi-service staggered visit

ICP fit	Mode	Flow	Outcome	Demo tip
Multi-master salon	booking	Per-line master_id / start_time → single book	Correct timeline in CRM	Parallel vs sequential

UC-5 — Reschedule / cancel / remove service

ICP fit	Mode	Flow	Outcome	Demo tip
Any booking tenant	booking / general	reschedule / cancel / remove (not second book as move)	CRM state correct	Show wrong path refused

UC-6 — Unfinished booking overnight

ICP fit	Mode	Flow	Outcome	Demo tip
Mid-funnel drop-offs	booking	Slots at night; phone later → funnel resume	Higher completion	Sandbox pause

UC-7 — Lead gen: campaign → brief

ICP fit	Mode	Flow	Outcome	Demo tip
Agency / consult	leadgen	Qualify → submit_brief → Telegram + optional KeyCRM lead	Structured brief	Brief fields vs free-form

UC-8 — Handoff: angry client / refund

ICP fit	Mode	Flow	Outcome	Demo tip
All segments	any	request_handoff → Telegram card; manager replies	Brand-safe escalation	IG app echo in admin

UC-9 — Night silence → soft follow-up

ICP fit	Mode	Flow	Outcome	Demo tip
Soft closes	Smart-trigger on	18h silence → one contextual nudge in Meta window	Recover abandoned intents	Settings delay + TZ

UC-10 — Multi-branch network

ICP fit	Mode	Flow	Outcome	Demo tip
2+ locations	booking / general	Branch select → slots/book scoped to location	Correct salon calendar	Two free_time calendars

UC-11 — Safe launch (Debug whitelist)

ICP fit	Mode	Flow	Outcome	Demo tip
First go-live	any + Debug	Whitelist only → then Public	No accidental public AI	BP-2 + BP-3 checklist

UC-12 — Hybrid: KeyCRM + BeautyPro

ICP fit	Mode	Flow	Outcome	Demo tip
Brand + studio	general + by_action	Products → KeyCRM; appointments → BeautyPro	One agent, two backends	Routing table

UC-13 — Altegio network: CRM from 24h

ICP fit	Mode	Flow	Outcome	Demo tip
Beauty/wellness on Altegio	booking / general	Altegio credentials → routing (CRM from 24h) → Meta/prompts → book in DM	Schedule lives in Altegio	SLA: CRM ≥24h vs go-live ~48h

8. Value props, qualification & anti-ICP

8.1 Value by segment

Segment	Primary value	Proof
E-com / brand (sales)	Catalog-aware DM → order → Telegram + KeyCRM	UC-1, UC-2
Salon / fitness / dental	Services & booking (BeautyPro, CleverBOX, Altegio); CRM from 24h	UC-3–UC-6, UC-10, UC-13
Lead gen	Qualify + brief to managers	UC-7
All	24/7 first line + human escalation	UC-8, UC-9, UC-11

8.2 Qualification script (15 minutes)

1. Volume: How many sales/booking DMs per day (not likes)?
2. Channel: IG Business + Page — who owns Business Manager?
3. Outcome: Sell products, book visits, or both?
4. Sink: KeyCRM / BeautyPro / CleverBOX / Altegio / Telegram only?
5. Owner: Who pays monthly and who edits answers?
6. Timeline: When must first live reply ship? (CRM hookup from 24h; full go-live ~48h)
7. Constraint: Any “AI must never...” rules?

Pass: volume + owner + Meta path + sink. **Hold:** Meta broken → fix first. **Fail:** no DM revenue intent or hard disqualifier.

8.3 Anti-ICP

- Expects “magic connect” instead of Meta App Review / BM work.
- Only needs comment auto-replies without DM sales loop.
- Wants one shared bot for many unrelated brands without isolation.
- Primary channel is WhatsApp/Viber; Instagram is vanity.
- No willingness to review prompts or catalog after go-live.

8.4 Persona one-liners

ID	Line
BP-1 Owner	Buys speed-to-revenue and headcount leverage.
BP-2 Operator	Buys fewer repetitive chats and cleaner handoffs.
BP-3 Tech	Buys a Meta/CRM setup that doesn't break (CRM from 24h).
BP-4 Star seller	Needs role preserved as escalated closer.

9. Demo agenda (30 minutes)

Min	Topic	Owner
0–3	ICP confirm (volume, mode, CRM — Altegio if relevant)	Sales
3–8	Architecture + SLAs (CRM from 24h; go-live ~48h)	Tech / Sales
8–18	Live use case (UC-1, UC-3, or UC-13)	Champion watches
18–23	Handoff + admin (UC-8)	Ops
23–27	Teach / Sandbox / Debug launch	Ops
27–30	Pilot scope, timeline, next step	Economic buyer

Runtime source of truth: product code and docs/AGENT_RUNTIME.md. Markdown twin: docs/ICP_BUYER_PERSONAS.md.
